EXAMINER

YOON, TAE H

ART UNIT PAPER NUMBER

1714

DATE MAILED: 07/24/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/069,550	Applicant(s) TOKITA, SUGURU	
	Examiner Tae H Yoon	Art Unit 1714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02/27/02.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 2 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 and 2 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Art Unit: 1714

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 3-052983 or JP 5-279622.

JP983 teaches a modified polyolefin having an improved adhesion strength in abstract. Maleic anhydride and the use of ≥ 5 C higher alcohol having one or more hydroxyl groups are taught. Said higher alcohol encompasses the instant diol. A copolymer having 50 mol% of propylene component grafted with 0.1 wt% of an anhydride would meet the instant mol. JP622 teaches the same (anhydride reacted with a diol having MN of 150) in abstract.

Thus, the instant invention lacks novelty.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 3-052983 or JP 5-279622.

Art Unit: 1714

The instant invention further recites an amount of an organic solvent over JPs. It would have been obvious to one skilled in the art to utilize a workable concentration such as claimed amount for a coating composition in JPs absent showing otherwise.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (US 4,146,590) or Xiao et al (US 6,211,290) in view of JP 5-279622 or JP 3-052983.

Yamamoto et al teach a modified polyolefin having high adhesion strength in abstract and examples wherein the use of dicarboxylic anhydride and ethylene glycol is seen for example. The instant acids and anhydrides thereof such as maleic anhydride are taught at col. 3, lines 45-54, and polyols are taught at col. 4, lines 22-24. The example 1 would meet the instant mol. Xiao et al teach a modified polyolefin having high a pendant polar chain of at least one ester group and at least one hydroxyl group in abstract and at col. 3, lines 56-66. The instant acids and anhydrides thereof such as maleic anhydride are taught at col. 4, lines 37-51, and the teaching at col. 4, lines 52-58 would meet the instant mol.

The instant invention further recites an organic solvent over Yamamoto et al and Xiao et al. However, the use of such modified polyolefin in an organic solvent for coating compositions is well known as taught by JPs.

It would have been obvious to one skilled in the art to utilize the modified polyolefin of Yamamoto et al or Xiao et al in an organic solvent taught by JPs in order to obtain a coating composition in a workable concentration since the use of such

Art Unit: 1714

modified polyolefin in an organic solvent for coating compositions is well known as taught by JPs.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tae H Yoon whose telephone number is (703) 308-2389. The examiner can normally be reached on Mon-Thu from 8:00 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan, can be reached on (703) 306-2777. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9310.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
